#### Less Prime Power, More Efficient

CPI's environmentally sealed 200 W Ku-band hubmount TWTA is the most efficient amplifier in its class. Consuming only 650 W prime power to achieve 175 W at the flange, the Mini-Ku is at least 24% more efficient than any similar product.

#### Reliable

Designed and built to survive in extremely adverse environmental conditions. Operates in ambient temperatures up to 60°C.

#### Digital Ready, Simple to Operate

User-friendly microprocessor-controlled logic. Integrated Ethernet computer interface and forward power detection over CIF are now standard. A variety of optional configurations, including integral linearizers and BUCs, is available.

#### Highly Compact

10% smaller and 25% lighter than any other 200 W TWTA.

#### Easy to Maintain

Modular design and built-in fault diagnostic capability via remote monitor and control.

#### Global Applications

Meets International Safety Standard EN-60215, Electromagnetic Compatibility 2004/108/EC and Harmonic Standard EN-61000-3-2 to satisfy worldwide requirements.

#### Worldwide Support

Backed by over three decades of satellite communications experience and CPI's worldwide 24-hour customer support network that includes sixteen regional factory service centers.
